MARC DARRYL DALANGIN

Manila, MNL | P: +639605699245 |
Email: marcdarryl.work@gmail.com | Github: github.com/marcdalangin | Portfolio: marcdarryl.vercel.app

PROFESSIONAL SUMMARY

Remote web developer with 2+ years of async client and team work, building full-stack apps and automation tools in Python, TypeScript, React, and Node.js. Based in the Philippines (UTC+8), available for US/AU/EU overlap.

SKILLS

Languages: Python, JavaScript, TypeScript
Frontend: React, Next.js, Tailwind CSS, Zustand
Backend and Cloud: AWS, Docker, Infrastructure as Code, Cloudflare Pages
Tools: Git, Slack, Notion, Jira, Chrome Extensions (Manifest V3), Web Scraping

PROFESSIONAL EXPERIENCE

XIETECH Remote
Junior Software Engineer (Part-time) Jun 2026 - Oct 2026

- Built 14 responsive UI components for a Next.js/React 19 landing page using Shadcn and Tailwind CSS v4.
- Managed state with Zustand and shipped via static export to Cloudflare Pages.

DATACENTRIC CORPORATION Muntinlupa, PH
Data Analyst Jul 2024 - Present

- Built a Chrome extension (JavaScript/TypeScript) that auto-creates data alerts, adopted by 55 teammates and cutting response time to data issues from 5 minutes to under 1 minute.
- Wrote Python scripts to validate 10,000+ live data points daily across multiple feeds, cutting manual QA effort.
- Partnered with 5+ teams to re-architect a data pipeline handoff process, reducing processing delays by ~20%.
- Prototyped a Manifest V3 Chrome extension that syncs fixtures every 30 minutes and exports CSV/HTML diff reports.

KNOWLES TRAINING INSTITUTE Remote
Software Developer Intern (Part-time) Feb 2024 - Jul 2024

- Streamlined cloud provisioning with Python Infrastructure-as-Code scripts, cutting provisioning time by 60%.
- Resolved incidents 40% faster by automating monitoring and alerting.
- Maintained legacy migration logic by refactoring it for better performance and PEP 8 compliance.

FREELANCE Remote
Software Developer Feb 2023 - Jun 2024

- Developed responsive full stack web applications for 5 student clients' capstone projects, from requirements to deployment.
- Built booking and scheduling features for 2 projects using Node.js and Google Calendar API.
- Automated AWS and Docker deployments, improving release reliability and reducing setup time by 70%.

EDUCATION

PAMANTASAN NG LUNGSOD NG MUNTINLUPA Muntinlupa, MNL
Bachelor of Science in Computer Science Jun 2020 - Jul 2024
Cumulative GPA: 3.30/4.0
